EDUCATION

Ecole Polytechnique Fédérale de Lausanne (EPFL), Switzerland *2018-now*

PhD in Electrical Engineering
• Thesis: Vehicle behavior prediction for self-driving cars
• Advisor: Alexandre Alahi

Sharif University of Technology, Iran *2016-2018*

M.S in Electrical Engineering, GPA: 19.24/20
• Thesis: simulation and implementation of baseband processing blocks of a Massive-MIMO system based on 5G standard
• Advisor: Mahdi Shabany

Sharif University of Technology, Iran *2012-2016*

B.S in Electrical Engineering, GPA: 17.56/20
• Thesis: Booting an embedded linux OS on a ZYNQ Board

PUBLICATIONS*

• "Injecting Knowledge in Data-driven Vehicle Trajectory Predictors", **MH.Bahari**, I.Nejjar, A.Alahi, to be published in *Transportation Research part C (TRC), 2021, arXiv*

• Modified title: "an SVG-based Model to Make a Better Prediction", **MH.Bahari**, V.Zehtab, S.Ayramlou, MS.Khorasani, S.Saadatnejad, A.Alahi, *Submitted to ICCV 2021*.

• Modified title: "Adversarial Examples Make Prediction models Robust", **MH.Bahari**, S.Saadatnejad, P.Khorsandi, M.Saneian, S. Dezfooli, A.Alahi, *Submitted to ICCV 2021*.

• "Modified Joint Channel-and-Data Estimation for One-Bit Massive MIMO", **MH.Bahari**, SR.Rasoulinezhad, M.Amiri, M.Shabany, SA.Nezamalhosseini, to be published in *IEEE International Symposium on Circuits and Systems (ISCAS) 2021.*

• "Feed-forwards meet recurrent networks in vehicle trajectory prediction", **MH.Bahari**, A.Alahi, *Swiss Transport Research Conference*, 2019

*Drafts of all publications are available upon request.

RESEARCH EXPERIENCE

Vita lab, EPFL *2018-Now*

We study vehicle behavior prediction for autonomous vehicles using deep learning. More specifically, we are interested in generalizable, knowledge-aligned and accurate predictions.

Massive MIMO group, Sharif university *2016-2018*

Studied efficient design and hardware implementation of joint channel-and-data estimation in massive-MIMO systems with one-bit ADCs.

SARVNET Co. *Summer 2014*

Modified the NetFPGA project for a 10GB router.

HONORS AND AWARDS

• Awarded Marie Skłodowska-Curie Fellowship by the European Union for the doctoral degree, 2018-2022
• Achieving highest GPA among Electrical engineering master students, 2018
• Ranking 5th among almost 25,000 applicants in the nation-wide Entrance Exam for MSc degree, Iran, 2015
• Ranking 54th among almost 300,000 applicants in the nation-wide Entrance Exam for BSc degree, Iran, 2011

Talks

• Workshop on "Vehicle Behavior Prediction in Self-driving Cars from an Industrial Perspective", Winter Webinar Series (WSS), Iran, Dec 2020

Research Mentoring

Internships

Summer 2020

• Pedram Khorsandi, Mohammad Saneian, *adversarial examples in prediction models*

• Vahid Zehtab, Sana Ayramlou, Mohammad Khorasani, *Vector-based representations for trajectory prediction models*

• Hossein Zakernia, Mahdi Nikdan, Out-of-Distribution Generalization for prediction models

• Mohammadreza Samsami, *Causal learning for trajectory prediction models*

Master projects

2019-2020

• Mohammadreza Ebrahimi, *Constrained-learning for trajectory prediction*

• Ismail Nejjar, *knowledge-aware safe trajectory prediction*

• Frank Dessimoz, *Overcoming imitation learning challenges in Carla Simulator*

Skills

Programming Python | Pytorch | Matlab | C++ | CUDA | Verilog/VHDL | Git

Languages ***Native:*** Persian ***Fluent:*** English ***Beginner:*** Arabic, French

Other Activities

• Hiking, Reading, Traveling
